

can put one more variable or js variable in square brackets of form hash

Hi,

I have one question about hash variable, example below:

I use js cord below in hash variable,

```
var test = "so00001";
```

```
#form.order.amount[ + test +]#
```

this I don't try it by now.

Would you please tell me any one can be realized?

Its really urgent for me right now?

Hope one of them is working.

Looking forward to your support soon!

Thanks and Best Regards!

Gene
